

AircoSaver Results

- Multi-location (48 store) test with DOMINOS PIZZA (2009) - The controller immediate energy reductions are realized in excess of **twenty one percent (21%)** for an annual savings of \$156,863.
The return investment of the project is under one (1) year.
- Project Green Light certified AircoSaver AT&T install on 5/30/08 for Building E4509, Plantation, Florida. The controller energy reduction Cost per/Month savings of \$151.90. That was a **38.91%** reduction in cooling costs. The return investment for this install was eleven (11) months.
- State of Florida Pompano Correctional Facility showed an energy savings of **twenty two percent (22%)**.
- Energy Audit for Indian Institute of Technology, Bombay Campus.
Energy Savings achieved by installation of AircoSaver for a 1.5 ton AC. Thus savings of **35-40%** was seen when the energy saver was fitted. With a simple payback period of eight (8) months.
- HSBC Bank Test Evaluation Trial of the AircoSaver Unit was completed and verified by HSBC Engineers and, as a result, **24.4% energy savings** was recorded by data logger, HSBC is embarking on a procurement program from AircoSaver to install the system on all air conditioning units.
